Tuesday, 13 February 2007

Australia's first Joomla!Day, held in Melbourne on the weekend, turned out to be a great success.

With more than 50 people attending — including one Joomla!-virgin — the Australian scene looks set to become one of the top Joomla!Days on the events calendar.

"Joomla! 1.5 was the most talked about topic, and everyone just can't wait for it. It's certainly made me re-think my priorities and what I might be able to do to help towards the goal of getting 1.5 out as soon as possible," a tired but enthusiastic Brad Baker reports from down under. You can see more photos and read his full report on his [blog](#) and [itwire's report](#)..
