

April Fools madness

Contributed by Lawrence
Monday, 19 March 2007

Somewhere in early April, hopefully not competing with WSG or Tequp, the Melbourne Joomla! User Group will be staging some 'lightning' presentations on various aspects of Joomla! 1.5 and beyond

Here's a couple of ideas we've just thought up on the fly:

- Joomla! & Google's SOC '07 - What it means for local communities
 - Accessibility compliance post Beta 2
 - How to make a 'monster' app crash diet - cutting the Joomla! codebase down to a framework build
- We welcome speakers and presenters from outside the Joomla! community as well, not to mention new and innovative ideas from those inside it.

Location and details coming..
